Mathematics Bingo

Multiplication

Copyright Information -TheCanadianTeacher.com and Quentin D'Souza grants permission to reproduce the patterns in this book for noncommercial individual classroom use only. No part of this publication may be reproduced for storage in retrieval systems, or transmitted in any form unless downloaded directly from TheCanadianTeacher.com, without the prior written permission of TheCanadianTeacher.com and Quentin D'Souza.

You will need:

- Bingo Cards
- Call Sheet
- Chips (This could be pennies, plastic tokens, rocks or any other materials that are small enough to cover the number sentences on the bingo cards)

Instructions:

1. Give each player a card and some chips enough chips to cover their card.
2. The caller can use the call sheet to keep track of the bingo numbers called.
3. The player uses chips to cover the number sentence that equals the number being called.
4. Once a predetermined pattern has been achieved then the player calls out BINGO.
5. Ask player to read out number sentence with the answers and confirm answers with other players.

Tips: Print out the Bingo cards on paper. A good quality stock paper with firmness will help increase the longevity of the cards. Laminating the cards will also help extend the life of the cards.
